All rights are reserved. Reproduction in whole or in part is prohibited without the written consent of the copyright owner.  
P. 5/7

## **4. APPLICABLE DOCUMENTS**

### **4.1. Quick Start Guide**

- This document is provided as a PDF file. It explains how to start QTaste and start QTaste demos. It also contains the compilation procedure of the QTaste framework.

### **4.2. QTaste User Manual**

- This document is provided as a PDF file and is also accessible directly from the QTaste GUI as html (Help Menu).

### **4.3. QTaste Release Notes**

- This document is accessible through the “About” in the Help menu.

## 5. KNOWN LIMITATIONS

- The QTaste test thread can be blocked in some particular conditions and prevent the QTaste kernel to restart it (due to some java Thread.stop() limitation).
- If a TestAPI interface extends another java interface, the generated TestAPI documentation doesn't inherit the javadoc of the extended interface. (workaround: The javadoc have to be recopied in the TestAPI interface).
- No example of Simulators is provided.
- Only Jython is supported as QTaste TestScript scripting language.
- QTaste starts/stops command is not working on Windows XP Home edition as "taskkill" and "tasklist" executables are not provided on this edition.
- The calculator demonstration is not working on Windows 7.
